

COMMUNICATIONS

## Fibre Optic Internet is Coming to Clinton

ABC Communications is excited to announce we will be working to deliver the latest cutting edge internet technology to your town. Our first stage of engineering is complete and now we need your support. Fibre optic technology offers near limitless internet speed opportunities and it will be a major project to complete.

To help us decide which areas need service the fastest we are asking people to show their support by signing up in advance.

To sign up to support the project visit [www.abccommunications.com/fibre](http://www.abccommunications.com/fibre)

Look up your address, select a package and create an account on our system to ensure you will be one of the first to get this new service.

If you are an existing ABC Wireless Internet customer that is great, we still would like to see your interest in the new service through a signup.

We have divided Clinton into 4 zones. The first zone to reach 30% of the homes pre-signed up will be the first zone we offer service in! Have a friendly competition with your neighbours to see who will get the service first. We even have a community champion option to let you be the leader for your neighbourhood. Community champions will have the \$100 installation fee waived. They will also get a unique referral code you can use to get your neighbours involved. For every 5 signups using your referral code you will get 1 Month of free service!

Our initial package offerings. All packages require a \$100 one time installation fee.
