

INVASIVE PLANT PROGRAM

Was your property impacted by the Elephant Hill Wildfire?

Does your property have exposed soil that would benefit from seeding in 2019 to prevent weed invasion? If so, the Thompson-Nicola Regional District can help.

One of the impacts of the Elephant Hill Wildfire was the loss of vegetation that helps to compete against weed invasion. The TNRD has obtained funding for the next three years to work on private lands to ensure that invasive plants aren't given the chance to expand in the area.

If you can use help with seeding or invasive plant control within the Elephant Hill Wildfire area, contact Mike at invasiveplants@tnrd.ca or 250-377-6297. There will also be an informational open house at the Royal Canadian Legion Branch in Clinton on March 26 from 3:00 to 7:00 pm, with presentations given at 3:30 and 6:30 pm.

The Wildfire Invasive Plant Program is supported by the Canadian Red Cross.

More info will be posted at www.tnipmc.com.
